

Don't let leg pain and swelling ruin your holidays.

If you experience pressure, pain, swelling, heaviness or restlessness in your legs, you may have venous disease. Left untreated, venous disease conditions, such as varicose veins, can potentially lead to blood clots, skin ulcerations and other serious complications. Call today to sign up for our Free Risk Assessment. At the event, we will assess your risk factors and provide information about our new, minimally invasive procedure that can relieve varicose veins without the pain of traditional treatments.

Free Varicose Vein Risk Assessment Wednesday, December 7, 2011 • 5:00 p.m.

The Surgery Center at Woodland Heights
117 Gaslight Medical Pkwy.

To register, call 936-637-8688.
