

Make a date to do something special for yourself ... and your family.

During National Breast Cancer Awareness Month, we invite you to experience our digital mammography services, which provide clearer images and faster results. A screening mammogram can help detect breast cancer in its earliest and most treatable stages. If you are 40 or older, or are considered to be at risk, the American Cancer Society recommends a screening mammogram each year.

If it is time for you or someone you love to have a mammogram, please don't wait. Schedule your digital mammogram during the month of October and receive a FREE mini lunch tote. **To make an appointment, call 936-637-8514.**

Appointments are on a first-come, first-served basis. A physician order is required and the patient must provide the physician's name when an appointment is made. If the patient does not have a physician, a list will be provided for the patient's selection. All mammogram reports will be sent to the physician and follow-ups are the responsibility of the patient.
