

See how we compare...

The information below comes from The Centers for Medicare & Medicaid Services (CMS). “Hospital Compare” displays rates for Core Measures that show compliance to the recommended standards of care for patients being treated for a heart attack, heart failure, pneumonia, and surgery patients. Woodland Heights Medical Center voluntarily submitted data from our medical records about the treatment our adult patients received for these diagnoses. The information below compares Woodland Heights to Memorial Medical Center and the State and National averages, which is available through the Hospital Compare website.

	Heart Attack	Heart Failure	Pneumonia	Surgery	Overall Inpatient
Woodland Heights Medical Center (current-1st quarter 2009)	98.4%	98.2%	97.2%	99.5%	98.3%
Woodland Heights Medical Center (07/07-06/08)	100%	96.3%	96.4%	94.5%	96.8%
Memorial Medical Center (07/07-06/08)	65.4%	98.5%	92.3%	88.8%	86.3%
State of Texas Average (07/07-06/08)	79.3%	85%	88%	83.8%	84%
National Average (07/07-06/08)	82.4%	84%	88%	97%	87.9%

The physicians and staff of Woodland Heights are committed to providing the best care possible to our community and being the leader in service excellence and quality.
